SPORTS CARS

Educational Build

Driven by Adventure.

greatbritishsportscars.co.uk

We have supplied a large number of educational facilities from Schools, Colleges to Universities all over the world. We have found that building your own car from scratch is a popular choice and an ideal method to teach your students.

It's also a great opportunity for the students to gain practical experience and develop their knowledge and understanding of engineering in a practical application. As well as being an exciting and captivating project for everyone involved, it maintains interest and enthusiasm all the way through with a real sense of achievement as each stage is completed with the end result not only being an enjoyable sports car but a worthwhile asset.

We welcome any enquiry you may have about the self build kit and as a company we are willing to help and assist you through your build.

'The next generation of car builders are the future to the British motor industry'

Develop their knowledge & understanding of engineering in a practical application.

Enjoyment at the end.....

As well as being an exciting and captivating project for everyone involved, it maintains interest and enthusiasm all the way through with a real sense of achievement as each stage is completed with the end result being able to offer another experience.....

Completed with the end result not only being an enjoyable sports car but a worthwhile asset.

The Phonenix Academy Trust, Grantham visit Great British Sports Cars.

A big thank you to GBS for taking time out of their very busy schedule to spend time giving a fully guided factory tour. Pupils were made to feel very welcome as they were introduced to all aspects of the car manufacturing business. The pupils gained an insight in to past, present and even future projects, looking at not only the development in cars but also the development in machines. The pupils had a varying degree of mechanical knowledge, however the tour was pitched at a level where all pupils could understand, and the more mechanically minded had their knowledge challenged and advanced, ensuring all pupils remained engaged and interested. The pupils really enjoyed their visit to GBS and both staff and pupils were made to feel very welcome by all employees throughout our visit. A great factory tour.

Mr James Pointing (Teacher)

I have been interested in cars and mechanics for a few years now, so when the teacher told me I was going to look around the GBS factory, I was very excited. I was very impressive to see how the mechanics at GBS are able to turn raw materials into fully functional sports cars. I particularly liked watching the workers operate the CNC machines, it was amazing to see how a block of metal goes in and a car part comes out. After going on the GBS tour, I am 100% certain I want to work in mechanics. Thank you for showing us around.

Rhys (Student, 16 years old)

GBS Student Factory Tour:

We offer several factory tour opportunities including Student factory tours at the Great British Sports Cars facilities throughout the year which include seeing a full behind the scenes of how our bespoke sports cars and products are produced.

Depending on the tour it can cover our Shop & Showroom / Engineering / Fabrication/ Workshop / parts & Spares / Composite / Design departments and more.....

Tours are expected to last around 1.5 to 2 hours with questions and answers at the end. We welcome groups of up to 15 Students.

Students will be able to see the full production from start to finish of our cars and components. For more details and to book a student factory tour get in touch with the GBS Team.

FAQ:
Have a question?
Then you might find the answer
here.....

1. How much do the educational builds cost? What is included with them? Is it similar to the Ultimate Self Build Zero or PLUS Kit?

This very much depends on the specification and the level of build, we are able to supply every part needed for either a donor base build or a new component build.

2. How detailed is the build manual? Photos of each stage or process?

We can get you a copy of this sent over to you, we offer full technical support through out and can arrange visit to support the build if needed.

3. Can we arrange a tour of your factory with our Engineering students? What group sizes can you accommodate?

Defiantly we offer this as part of the package, the group size is around 10-15 students to enable us to give them a detailed tour of the whole production process etc.

4. Are the Student factory tours free?

We offer one student Factory Tour for upto 15 Students free when you order your kit, then any additional tours may be charged for.

5. Are there any specialist tools required?

No, you should be able to build the Zero with a good general tool kit consisting of a range of spanners, sockets, drill etc there is no welding or cutting required

6. IVA & Registration, is this something you can support us with?

Yes everything within the kit is design around the IVA requirements, we are then able to put the car through the IVA test and do all the registration paperwork etc.

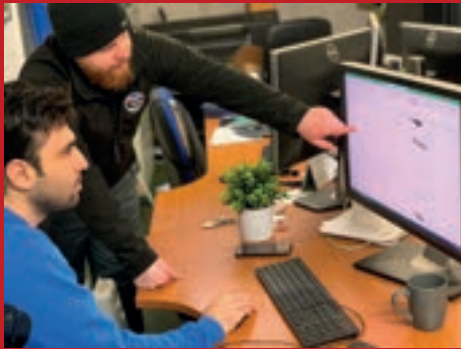

7. How many hours have colleges or similar taken to build their cars? Very much depends on the college and how they are doing it, and how many students are working on the build etc.

We welcome any enquiry you may have about the kit build and options we offer.

Send us photos & updates of the Zero build as it progresses and we can share them on social media channels.

We offer a full factory tour of our facilities to Students, allowing them to see all behind the scenes of what we do.

Pleased to offer student placements with the University of Nottingham, Nottingham Trent University & Lincoln University.

Working with the University of Cambridge in collaboration with a Innovate UK project.

Currently have two Apprentices with us at GBS through West Nottingham College and are looking to offer more apprenticeships.

Student work experience opportunities are offered where possible in all departments of GBS.
